

MEATH EPILEPSY CHARITY

Required driver flexibility to plan more trips for residents

The minibus on its first outing, taking residents to a hydro pool session.

As we are a charity we rely heavily on charitable donations and we received a generous donation for a new minibus. We began to research what type of minibus would best suit our needs and found that a minibus which didn't require its drivers to have a D1 licence would be of great help to us. The pure flexibility which this provides us is great; it means that we can plan more trips for our residents which they really benefit from and in addition all our staff love driving it.

We have had a very positive customer experience from start to finish. The customer focused service is very welcome and a rarity these days. We are very happy with our Minibus Lite and it has without a doubt had a very positive impact on our residents and organisation as a whole. I would highly recommend Minibus Lite to other organisations.
